Towards More Sustainable and Trustworthy Reporting in Machine Learning
Raphael Fischer, Thomas Liebig, and Katharina Morik - full paper published in *Data Mining and Knowledge Discovery* (2024)

**Mission:** With ML being used across all domains, we need to consider how intricacies of models and methods can be better communicated to non-expert users!

---

**On the horizon:**
- Interdisciplinary study on *effectiveness* of labels => **Interview partners needed!**
  => Further information and contact / entry form available on [our website](http://example.com)
- Research extensions & business opportunities for *model selection* and *AutoML*
  => Additional papers accepted and to be presented at *ECML & KDD '24*
